EDUCATION

Haldia Institute of Technology — Haldia, West Bengal
Bachelor of Technology in Computer Science and Engineering
Expected Graduation: July 2028 | CGPA: 9.25/10

EXPERIENCE

Eastri | Web Development Intern (Aug 2025 - Nov 2025) | Mumbai, Maharashtra

- Developed 10+ reusable UI components, reducing duplicate implementation effort and improving consistency across application interfaces.
- Improved Lighthouse performance score from 75 to 92 through asset optimization, component-level improvements, and reduced unnecessary rendering.
- Collaborated within an existing codebase using Git-based development workflows and reusable component architecture.

Amaanitvam Foundation | Full Stack Developer Intern (Jul 2026 - Present) | Remote

- Developed and maintained the Learning Resources module using React.js, Node.js, Express.js, and MongoDB.
- Built REST APIs for resource upload, update, deletion, search, filtering, and pagination.
- Designed MongoDB schemas for resource metadata, categories, subjects, domains, and access-related information.
- Collaborated with the engineering team to deliver scalable backend services and responsive frontend features for the digital learning platform.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, Python, SQL
- **Frameworks & Technologies:** Spring Boot, Node.js, Express.js, React.js, Next.js
- **Database & Caching:** PostgreSQL, MySQL, MongoDB, Redis
- **Tools & Cloud:** Git, GitHub, Docker, Postman, Vercel, Render, Cloudinary
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, REST APIs
- **AI/ML:** scikit-learn, Pandas, NumPy, Machine Learning, Generative AI, LLMs

PROJECTS

Interview Preparation Tracker | Next.js, Tailwind CSS, MongoDB, Express.js, Gemini API

- Built a full-stack platform for interview preparation, progress tracking, and AI-assisted mock interviews.
- Integrated Gemini API to generate context-aware interview questions and personalized feedback based on user performance.
- Designed REST APIs for interview sessions, preparation progress, and user-specific data management.

Link Shortener | Spring Boot, React.js, Tailwind CSS, PostgreSQL

- Engineered a full-stack URL shortening service with persistent short-link generation, redirect handling, click tracking, and analytics.
- Designed RESTful APIs using Spring Boot for short-link creation, URL resolution, and analytics retrieval.
- Modeled and persisted URL mappings and click metadata in PostgreSQL for reliable link management.
- Implemented collision-safe short-link generation and redirect resolution with persistent PostgreSQL storage.

Placement Prediction System | Python, scikit-learn, Pandas, NumPy, FastAPI

- Built and evaluated classification models including Random Forest, Decision Tree, and Naive Bayes.
- Exposed the trained model through FastAPI endpoints for real-time predictions.
- Achieved approximately 79% prediction accuracy with the selected model on the evaluation dataset.

ACHIEVEMENTS

- Solved 600+ Data Structures and Algorithms problems on LeetCode.
- Qualified up to Round 3 of Flipkart GRiD 8.0.
- Scored 93% in NPTEL Programming in Java certification.
- Nominated for Smart India Hackathon (SIH) 2025 and SIH 2026.
